- Whirlpools and Soakers ship within 3-5 working days.
- Air Baths ship within 7 working days.
- Local distributor may charge additional freight and/or residential delivery charges.
- Published prices are Manufacturer's Suggested Retail Price. See your local MTI dealer for best prices.

**MTI Distributor Multiplier Does Not Apply.**

**CONSTRUCTION AND STANDARD FEATURES**

**ALL INTEGRAL SKIRTED BATHS**

- Durable Lucite® high-gloss cross-linked cast acrylic.
- Bath reinforcement consisting of a thick layer of fiberglass/ titanium / resin, plus 1/2" metal reinforcement in all 4 sides.
- Leveled Foam Support System for more efficient installation. No need to use additional bedding compound.
- Integral tile flange on 3 sides.
- Left- or right-hand drain configuration (must specify when ordering).
- Front panel is removable for whirlpools and air baths.
- Textured bottom meets ASTM F-462-1994 slip resistance.
- 2-year residential warranty.

**ADDITIONAL FOR WHIRLPOOLS**

- Fully-adjustable point-massage jets.
- 1 bhp whisper-quiet pump with silent air volume control.

**ADDITIONAL FOR AIR BATHS**

- 3/4 bhp heated blower with an automatic purge cycle that dries the air system lines 20 minutes after use.
- Twelve 6-port low profile air jets (72 air streams) are installed on the tub floor with color-matching air caps.

- **Inline Heater** (for whirlpools) - A 650-watt heater, activated by whirlpool pump, is designed to maintain water temperature at 102°F, not to heat cold water.

- **Inline Heater** (for soakers and air baths) - Water is drawn in through an intake and a 650-watt heater, then re-introduced into the bath through an output with negligible disturbance to the water. This system uses a re-circulating pump activated by an on/off switch.

Intake (shown) and output have the same appearance and are mounted on opposite sides of the tub.

- **Trim Kit** - Available for whirlpools. Includes jet escutcheons, on/off control, air-volume control and suction cover.
